

## Lasers

The CKJ-G39 is the ideal, easy to use laser machine for all users and requires no previous experience. Our lasers come with a recirculation tube of the highest quality. This powerful CO2 laser makes light work of cutting, engraving and etching a very wide range of materials such as plastics, acrylic, foam, slate, timber and leather. These machines come with a slat and honeycomb bed for all types of laser work. The G39 and G09 come as a free standing laser so it is self contained with an extraction system to pull fumes out. These machines also have wheels and adjustable legs for easy relocation if necessary.

# CKJ-G39 LASER

- XYZ axis 1300 x 900 x 200
